

NATURE AND BIODIVERSITY

at Camiral Golf & Wellness

For years, at Camiral, we have focused on preserving and promoting the biodiversity of the environment in which we live, developing a native ecosystem and promoting activities for well-being and to provide a more sustainable life. All of this was recognised in 2020 through the *IAGTO Award for Sustainability for the Protection of Nature*, which is part of the **IAGTO Awards** and **recognises excellence in environmental and social responsibility**.

Oriol Dalmau, our biologist, has worked and continues to work on a series of programs and actions that aim to preserve and grow the diversity that surrounds the resort as well as promoting activities so that everyone can learn about it first-hand.

We want each of our residents to participate in our commitment to conserve biodiversity at Camiral and become a world reference by making a golf resort act as a natural reserve.

NEST BOXES

Among the actions carried out by Oriol are the placing of nest boxes throughout the resort that help us to shelter many native species that are key to the proper functioning of biodiversity, including feeding on insects, worms and rodent. Below, you can see the options of nest boxes and insect repellent plants, mainly flies and mosquitoes, that Oriol may place in your garden to also help generate biodiversity:

01 Green Woodpecker, Hoopoe, Scops Owl, European Ratchet

They are some of the key species for the resort as they help prevent and detect pests in the playing area of the golf courses by feeding on the caterpillars, larvae and mosquitoes of the lawn that eat the root of the grass.

€50 VAT incl.

Dimensions
55 x 28 x 20 cm

02 Small Owl, Tawny Owl

These nocturnal birds feed on rodents at night.

€56 VAT incl.

Dimensions
56 x 35 x 27 cm

at Camiral Golf & Wellness

03 White Wagtail, Nightingale, European Robin

In addition to some of them being known for their song, they also feed on mosquitoes when they are on the ground.

€46 VAT incl.

Dimensions
25 x 24 x 19 cm

04 Chickadee, Sparrow, Common Hoarder

These birds will seek refuge in this nest box from where they will hang from the tree branches to feed on the mosquitoes that hide in the leaves.

€46 VAT incl.

Dimensions
30 x 25 x 20 cm

NATURE AND BIODIVERSITY

at Camiral Golf & Wellness

05 Nuthatch, Common Starling, Little Red Woodpecker

These are some of the species that will come to seek refuge in this nest box where they will also feed on the insects that live in the trunk of the trees.

€50 VAT incl.

Dimensions
55 x 25 x 28 cm

06 Bat

One of the most popular nocturnal mammals that also feeds on mosquitoes at night.

€50 VAT incl.

Dimensions
30 x 25 x 20 cm

PLANTS

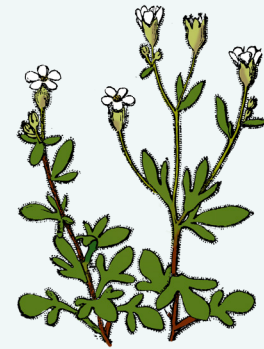

All these plants have a common characteristic in that they act as repellents for insects, mainly flies and mosquitoes, in addition to being naturalised plants in accordance with the environment that surrounds us.

Lemon bee brush

Lemon thyme

Rue

Basil

Lemon geranium

Citronella

€8 VAT incl.
(without planting - check availability and price for planting)

NEST BOXES AND PLANTS PACKAGES

Oriol has designed packages combining nest boxes and plants that will promote the elimination of insects, grass caterpillars and rodents in a natural way, thus helping to preserve the resort's global biodiversity.

Nº1 Chickadee and Bat Refuge (Insect Repellent)

Functionality: Give shelter to the chickadee and the bat that together with the Rue and the Geranium will act as eliminators and repellents of insects day and night

Includes:

Nest box for
Chickadee

Nest box for Bat

2 Rue
plants

3 Geranium plants

€200 VAT incl.

Install and plant

All packages include the price of a preliminary assessment of the space, installation of the nest boxes by Oriol Dalmau and planting.

*Buy your nests, plants or packages at Residents Club
or residentservices@camiral.com*

NATURE AND BIODIVERSITY

at Camiral Golf & Wellness

Nº2 Chickadee and Woodpecker Refuge (Insect repellent and prevention of pests in grass)

Functionality: Provide shelter for the chickadee and woodpecker that together with thyme and citronella will act as daytime insect killers and lawn cleaners.

Includes:

Nest box for
Chickadee

Nest box for

2 Citronella
plants

3 Lemon Thyme
plants

€200 VAT incl.
Install and plant

All packages include the price of a preliminary assessment of the space, installation of the nest boxes by Oriol Dalmau and planting.

*Buy your nests, plants or packages at Residents Club
or residentservices@camiral.com*

NATURE AND BIODIVERSITY

at Camiral Golf & Wellness

Nº3 Chickadee and Owl Refuge (Insects and rodents)

Functionality: Provide shelter for the chickadee and the owl that together with Lemon bee brush and the Geranium will act as eliminators of insects by day and rodents by night

Includes:

Nest box for
Chickadee

Nest box for Owl

2 Geranium
plants

3 Lemon bee
brush plants

€206 VAT incl.

Install and plant

All packages include the price of a preliminary assessment of the space, installation of the nest boxes by Oriol Dalmau and planting.
